# UPLOAD HIRES FILES

SET TO "SKI RECORD HR", let it load,
SET to HOME WIFI, CLICK ON POST NOW, let it post
RESET TO GOPRO WIFI

1 After skiing, and app still running click on SKI /RECORD till it says SKI HR /RECORD

**2** Monitor indicator, as it shows the filename being loaded

3 When done loading it will say (No RecentFiles)

4 Press and hold the GREEN WiFi button

5 On new screen select your Home WiFi Network.

6 Once connected Click on 'Done'

7 Click on POST NOW

8 Monitor File names as they post

9 When Done it will say "No More unposted file"

0 Reset the WiFi to the GoPro (or it may get stuck on Home WiFi), and you can exit the app
