

One Pass. One Data Stream. Everything Automated.

1 CAPTURE YOUR WAY

Different capture hardware. The same MySkiTool pass-by-pass workflow.

GoPro + MySkiTool App

Simple boat-mounted capture

GoPro + DJI + Blackmagic

Wireless HD capture + recorder

MySkiTool Viewer App

Native phone / tablet capture

MYSKITOOL AUTOMATION

Trigger each pass (GPS / SurePath) | Identify skier | Capture score
Automatically triggers Blackmagic recording for each individual pass

EVERY PASS BECOMES AN IDENTIFIED VIDEO

VIDEO FILE

Individual pass + skier + score

CLOUD

Every pass uploaded and organized

VIEWER APP

Playback, review and sharing

LIVE SYSTEMS

Webcast graphics + AI audio

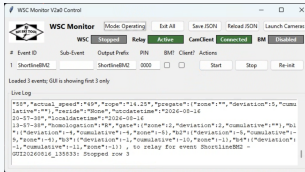

Every pass is captured to the MySkiTool cloud and available for playback through the MySkiTool Viewer App.

myskitool.com

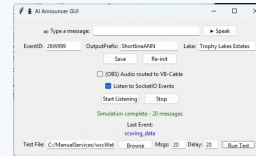

Tournament Automation

The same live tournament data that identifies each recorded pass can automatically feed the webcast overlays and synchronized announcer audio.

LIVE TOURNAMENT DATA CAPTURE

wscMonitor receives WaterskiConnect / SurePath data including skier, running order, pass, speed, rope and score. One live data source feeds the MySkiTool system.

REAL-TIME AI ANNOUNCER

Text-to-speech generates announcer audio in real time from the same skier and scoring information and keeps the audio synchronized with the broadcast.

AUTOMATED WEBCAST

HDMI video feed + automatically generated tournament overlays + synchronized announcer audio

CURRENT SKIER | RUNNING ORDER | LEADERBOARD | POSTED SCORE

Captured to the cloud. Ready to watch.

Every individual pass is automatically uploaded to the MySkiTool cloud, organized by skier and event, and available for playback through the MySkiTool Viewer App. Skiers can review, compare and share their videos from their phone.
